

Full Face Photography for Analysis and Treatment Documentation

VisioFace® 1000 D

- full face photography – comprehensive, economic analysis of the face
- hardware consisting of light facial booth in which the face is placed (frontally or sidewise)
- 210 white LEDs inside the booth diodes illuminating the face very homogeneously without requiring service

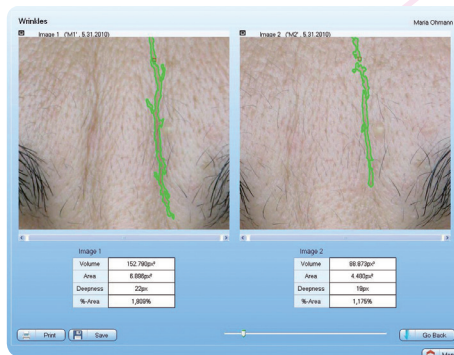

- built-in high quality, high resolution reflex camera not requiring any complicated set-up by the user; only plug in the device by USB for immediate use
- when VisioFace is out of use soft illumination by white diodes without heat development
- analysis embedded into the Complete Skin Investigation Software which also operates the Multi Skin Test Center
- software can analyse visible spots (on the colored image) as well as pores, wrinkles and colour differences in a chosen area of interest
- UV-like photo is generated by the software
- a 3D-image can be calculated
- up to four images of one customer can be placed side by side and zoomed in and analyzed separately or simultaneously

Full Face Photography for Analysis and Treatment Documentation

VisioFace® 1000 D

- live image can be placed over an already taken image of this customer in order to match same position of face
- several images can be taken at once and analyzed later
- products can be included in the software, e.g. for day, night or sun care; recommendations can be done according to age, gender and results
- informative report including photos, results and products to print out
- software can be personalized directly by customer in terms of colour, logo, images and fonts

VisioFace Wrinkles

Image	Volume	Area	Depress	%-Area
1	152.790µm³	8.888µm²	23µm	1.809%
2	88.873µm³	4.403µm²	19µm	1.175%
